New York, NY 10016

Test Name	Result	Flag	Reference Range	Lab
<b>HEMOGLOBIN A1c</b>				
HEMOGLOBIN A1c	7.4	HIGH	<5.7 % of total Hgb	01

For someone without known diabetes, a hemoglobin A1c value of 6.5% or greater indicates that they may have diabetes and this should be confirmed with a follow-up test.

For someone with known diabetes, a value <7% indicates that their diabetes is well controlled and a value greater than or equal to 7% indicates suboptimal control. A1c targets should be individualized based on duration of diabetes, age, comorbid conditions, and other considerations.

Currently, no consensus exists regarding use of hemoglobin A1c for diagnosis of diabetes for children.
